Joint Marketing Chinese Newbuildings

Seaspan and Marcon are pleased to announce a program to deliver turn-key, high quality Chinese new barges and vessels built to best international standards and design. The vessels and barges will be built by smaller, specialized Chinese shipyards which focus on barges, drydocks, smaller ships, and modules for Japanese shipyards. Classification may be by Lloyd's, American Bureau of Shipping, Det Norske Veritas, Bureau Veritas, Nippon Kaiji, Kyokai, or other internationally recognized major Societies.

The key benefits of this proven turn-key program are quality control and integration of a full service package covering financial, technical and supervisory requirements, plus delivery to the buyer's desired location.

Services Offered:

- Local experience, knowledge, and relationships.
- Constant supervision and inspection by personnel from the local Shanghai office, together with a team of experienced North American supervisors to control quality.
- Agency in China.
- Handling of logistics for import of machinery, equipment, etc.
- Delivery via wet or dry-tow, as appropriate.
- Attractive financing for qualified companies.

Advantages:

- Internal/external coatings, with internationally recognized coatings such as International Paints, Jotun, Sigma, etc., with full manufacturer's warranty.
- All steel supplied from Classification Society approved steel mills, with random quality sampling available. All steel pre-blasted and treated.
- Continuous welding.
- Availability of high tensile steel for wear resistant decks and high stress areas.
- Fast, on-time, shipyard delivery.
- Flexibility in handling change to the work scope.

Four 212' barges have recently been built under this program for Canadian buyers at a Chinese shipyard currently employing 1,700 workers, and were delivered on schedule, July 1, 1998, in Shanghai, for wet-tow across the Pacific to Vancouver, B.C.

In addition to barges, we would be pleased to quote for new

construction of drydocks, inland river pushboats, tugs, landing craft, platform supply boats, modules, and dredges. Complete turn-key quotes for special projects including custom modules for international shipyards and bulk handling systems are available upon

request. Construction photographs of barges built to-date are available on the internet at www.marcon.com.

Marcon is pleased to announce the sale of the 85' Z-Drive 4000 BHP Tug *TIOGA* to Vessel Management Services (VMS), a Crowley Maritime Corporation subsidiary, from COOS BAY TOWBOAT, of Coos Bay, OR. VMS has entered into a long-term bareboat charter of the vessel to CROWLEY MARINE SERVICES (CMS). After an initial inspection at Coos Bay, OR, vessel sailed to Los Angeles, CA where she was drydocked for full inspection and painted Crowley colors. CMS will employ *TIOGA* in ship assist and escort work in and around Los Angeles and Long Beach Harbors. *TIOGA* was built in 1994 by Tri-Star of Seattle, WA to perform ship assist work. She is powered by a pair of Caterpillar 3516DITA's driving Ulstein 1650H Z-drives aft. Vessel develops a bollard pull of abt. 106,000 pounds and a free running speed of approximately 13.5 knots. "*Tioga* is yet another vessel employing the best achievable technology that will meet or exceed our customers' needs," said Jim Macaulay, CMS Regional Manager of Marine Operations for the Pacific Fleet. "It supplements Crowley's fleet revitalization program and furthers our commitment to having the most advanced, capable tugs."

Some other recent sales include: GENERAL CONSTRUCTION of Seattle, WA sold the 178' inland deck barge "*GC-174*" to NASH BRIDGES PRODUCTIONS of San Francisco. Barge will be used as a filming set for the television show "Nash Bridges". CROWLEY MARINE SERVICES, Seattle sold their 250'x76' sea going deck barge '*ST. MAARTEN*' to Transatlantic Cement of Panama. Barge was last employed in container feeder service out of Puerto Rico. New owners will use the barge in support of bulk cement transfer operations at their facility in Barranquilla, Colombia. This is the 2nd barge of this class within the past 6 months. AMAYA CURIEL & CO., Mexico purchased the 1500HP 164' twin screw tug "*DAPHNE*" from Pacific Northwest sellers. Tug was originally built in 1932 by Bath Iron Works as a Coast Guard Cutter and completely rebuilt and converted to twin screw tug in '62. Vessel has quite a history and is well known as a "hard-puller" regularly towing 317' LST barges laden with cement and containers between Seattle and Alaska. Buyers plan to sail the tug to Baja California where she will be engaged in gravel trade.
