WINTER 1999

\$18.00 U.S., Canada & Mexico: One Year
\$22.00 Other Countries: One Year

U.S. TUG MARKET

Of 1,786 tugs Marcon currently tracks worldwide, 698 are U.S. and 1,088 foreign. Only about a third are officially for sale, i.e. 100 domestic and 454 foreign. This is a "mixed bag" including some obviously priced at unattainable levels and not seriously for sale, some attractive candidates plus a number of lesser quality units becoming even more difficult to sell as the years go by. In the U.S. only 8 tugs for sale were built within the last 15 years and 74 are over 30 years of age. Full breakdown available on request.

A review of the past helps explain the background for today's prices. In the U.S., during the mid-80's downturn, good twin screw tugs were selling at 35 cents on the dollar. Even at this level boats were having difficulty finding Buyers. One example was a 10 year old, 5,750HP boat sold by the Federal Deposit Insurance Corp., after the bank went bankrupt to a West Coast buyer for abt. \$450,000. Building of tugs virtually ceased especially in the U.S., dropping from 47 in '78 to 7 in '84. As of July '98 the average age of U.S. anchor handling tugs (excluding AHTS) was 23.6 years. This makes the U.S. fleet one of the oldest in the world with only Vanuatu older at 24.3 years, noting many of these are controlled by U.S. corporations.

Normally as newbuildings come on line to replace aged tonnage, surplus tugs recycle to less demanding trades. In the early 80's, one Owner regularly listed vessels for sale as they reached 15 years age. Now his average fleet age is well over that. The lack of new buildings in the 80's - early 90's left a gap with no ready supply of new tugs to replace those lost through the normal attrition of foreign sales, sinkings or retirement. The existing tug pool had to take up the slack, resulting in increasing prices over the last 10 years. Especially in the U.S., second-hand tugs enjoyed a premium with some selling at surprisingly high numbers. We have finally reached the plateau in prices. Values remain strong, but current levels are now becoming dampened by a downturn in economies and oil prices. Even though there is still not much for sale, values have hit the peak and are starting to come down the other side. Modern twin screw tugs of medium to high horsepower continue to demand good prices, especially in the domestic market, but the "feeding frenzy" of '97 is behind us.

One Louisiana tug operator advises that the "oil patch" is slow after enjoying a steady rise in utilization & daily hire as drilling, exploration & production rose to highest levels in years. Regretfully this did not last and many local new construction plans have even halted. They expect the market to improve and are still looking to build higher horsepower boats to free up smaller 3-4000Hp boats for the S+P market late '99 or 2000. Requirements are slowing for traditional 3-5000HP AHT's as the biggest demand is now for boats 5600-7000HP +. In September, utilization for 3-4,000HP tugs dropped to abt. 50% of the peak 6 months before. One shipdocking company in the area says their market share and business is still growing steadily, but regretfully income is not increasing. Dollars are down and they do not see an improvement in tariffs in the near future. Due to increasing market exposure they are almost forced into purchasing a "new" tug to maintain market share. They recognize that it is still a "Seller's market" and wish they could wait another year, but need the tug now. A number clients hope that

some U.S. tugs will come on the market at bargain prices, but this is just "wishful thinking" and the term "bargain" is relative compared to previous high levels. Prices will decline slightly, but we will not have "fire sales" like in the 80's.

Worldwide tug prices for conventional tugs overseas remain stable with greatest price increases found in the 4-6000HP range. Values also increased through the mid-90's, but prices are leveling off as newbuilding tugs come on line and companies start to worry about a potential recession. In the past, foreign buyers had a home for redundant, outdated U.S. tonnage. But buyers are becoming more discerning in shopping and paying less for older boats. Most looking to modernize. There is a rising standard worldwide with some countries and registries putting an upper age limit on imported vessels. We have recently run into this problem selling one older vintage tug into Europe.

With few exceptions, buyers are seeking modern AHT's with double drum winches or docking tugs with CAT's, EMD's or Wartsila's. Although there are also a number of sales with Niigata, Yanmar and Mitsubishi's, other diesels such as Hanshin, Fuji's, Otsuka's and older style European / U.S. models such of Fairbanks, English Electric & Ruston's are not much in favor. Owner's are looking to standardize machinery. Manning is a key factor, as operators tighten up purse strings, looking for more efficient tugs with lower manning costs which are often the most significant operating expense. There have also been a lot of tugs coming on the market out of Asia due to their downturn. We received listings on over 129 tugs in the Far East in the last 9 months alone. Not all are necessarily attractive purchase candidates for many European buyers, but they definitely provide downward pressure on values and there have been some recent major purchases taking advantage of the situation.

U.S. single screw tugs are still selling, but they have to be "ready-to-work", "priced right" and perceived as "cream of the crop". They need to be suitable for ocean & long coastal tows with modern machinery, good winches and hydraulic tow pins. There is little interest in old, smaller units suited only for harbor work. It is a good time to try and sell "good" single screw boats to operators who need them now and cannot wait, as there is concern that the U.S. Navy may sell off their fleet of single screw tugs and call upon the private sector to take care of the business with new z-peller and tractor tugs. This would exert additional downwards pressure on prices for old boats. Overall this will be healthy for the industry, as will be offset by a major newbuilding program and general modernization of the domestic fleet. Moran just received a contract for 8 tugs to fulfill a Military Sealift Command contract in U.S. East Coast ports.

As we approach 2000, we forecast a shrinking demand for the total number of tugs - especially in the docking market. This is not just a cyclic aberration relating to effects of a worldwide recession. Future decrease in tugs would happen even in a buoyant market as larger and fewer ships require higher horsepower, more efficient and consequently fewer docking tugs. Port consolidation will also result in fewer port calls and continuing corporate mergers, muscling out the competition, consolidating of operators and pooling of resources will increase efficiency and cut down on the number of tugs standing by at ports.
