New Marcon Website

Marcon International, Inc. has recently upgraded its website www.marcon.com. The new site employs the latest technology for delivering dynamic database content to the Web and is enjoying an overwhelmingly positive response from Marcon customers and the marine community. New features include a daily updated, searchable database that makes it easy to find specifications on a wide inventory of vessels and barges. In addition to those listed for sale, the site also includes expanded sections on vessels and barges available for charter, tows of opportunity plus new designs from shipyards worldwide. Clients can quickly search listings and review technical specifications plus photographs or drawings when available. The site, first created in 1996, includes information on over 1,200 listings, up-to-date industry data, market reports and a library of informative industry related articles. Although Marcon tracks over 10,000 vessels and barges, those included on the Internet are only those updated within the last six months. Copies of the printed Marcon Newsletter in PDF format over the past year can soon be downloaded with archived copies going back to 1982 available in the future.

The Home Page still displays Recent News, Market Reports and Featured Vessels. A navigation bar on the left contains links to all site sections including listings, reports, library of downloadable documents and e-forms to list vessels, obtain tow quotes or additional information. A client can also type in the file number of a vessel or barge, if known, and go directly to specifications of that vessel. If the file number is not known, you can click on Sale, Charter, New Construction or All Listings and go to a Search Page where listings are selected by length, beam, horsepower, vessel type, flag or recent updates. Selected listings are first viewed in a table providing brief details such as vessel type, dimensions, machinery, year built, price and whether for sale, charter or a new design quote plus a link to further details. Features to be added over the next year are diesel engine specifications; glossary of nautical terms plus conversion tables for weights, measurements and currencies.

Marcon International, Inc. views web technology as a useful tool that enables our brokers to provide the very best customer service without replacing or sacrificing the tradition of personal contact between our staff and the clients. The new website was developed by Turner Miller Group of Mill Creek, WA using a combination of Access database and ColdFusion, a web application tool for developing and delivering scalable e-business applications.

U.S. Gulf Coast OSV Market

"In with a whimper and out with a bang" might be a phrase for this past year's activity for offshore service vessel owners and operators. The beginning of 2000 witnessed rates for the standard 180' PSV hovering at \$3,000 - 3,500/day, after one of it's worst years as the market came off a roller coaster ride of record highs. Utilization was down early 2000, and all major and minor players continued to tie up boats. Seabulk Offshore, a subsidiary of Hvide, struggled to maintain its position in the market and satisfy creditors after its previous spending / acquisition spree was hit by the precipitous drop in utilization and daily hire rates (not only in the U.S., but worldwide). Utilization started to pick up as the year progressed. Owners started taking a few vessels out of lay-up, but daily rates remained flat. Talk of scrapping vessels and removing old ladies from the market gained new ground as previously ordered newbuildings continued coming on line. Rates crept up slowly to \$4,000 / day in June/July and Tidewater Marine announced its intention to launch a \$300 million newbuilding plan, focusing almost exclusively on deep-water. As the months rolled into Fall 2000 we started to see increased activity in both shallow and deep-water markets with a rise in rates. On October 16th, Tidewater Marine declared an across the board increase in daily rates for its fleet in the U.S. Gulf to \$6,500/day for 180-190' supply boats. No seasonal slack-off is expected for the winter months and good times are forecast to roll on into Spring 2001. Are we now in the next boom cycle? If one were to listen to reports from publicly traded companies, then we would have to say 'yes'. Expected earnings for 2001 are set to continue in many cases at record setting levels. The bloom is back on the rose.

TransCoastal Divisions Sold

HBH, Inc., Woodson Construction and Kori Corporation were sold to Sunland Construction of Eunice, Louisiana. The three Louisiana-based divisions of the Houston based marine construction company TransCoastal Marine Services were involved in transitional zone pipe lay and construction work, with the Kori Corp. being the manufacturing arm building undercarriages and assembling marsh buggies for their worldwide market. The sale included all of the division's assets except real property at the Delcambre and Lafayette facilities. Also excluded from the sale is the 1995 built 260' x 72' pipelay / bury barge "BH-400", which remains available. Sunland Construction, Inc. is a pipeline construction company serving of major oil and gas companies throughout the U.S. Southeast, Central

and Rocky Mountain regions. Incorporated in Louisiana in 1974, they have grown into one of the largest

pipeline contractors in the U.S., employing an average of 500 people with a peak workforce of over 1,200 employees. By acquisition of the three ex-TransCoastal divisions, Sunland will expand their pipelay capability to marsh, swamp and coastal inshore areas. Excess of 40 items of floating equipment were included in the sale including inland lay, spud, jetting and crane barges, small tugs, crew boats, skiffs, marsh buggies, and work floats. Earlier this Fall, CSI Hydrostatic Testers, another TransCoastal division was sold to Weatherford International of Houston. Since the 60's the founding companies of TransCoastal's pipeline and marine group installed, repaired and rehabilitated pipelines both on and offshore worldwide plus hydrostatically tested pipelines and provided construction support services through marsh and swamp environments to onshore facilities. Through its divisions, Weatherford has provided for over a half-century expertise in well completion, well construction, production enhancement and well abandonment services. Weatherford employs more than 10,000 people and sells its products and services through divisions that operate in more than 300 locations worldwide. Marcon was retained as exclusive broker by the Bankruptcy Trustee to assist in the disposal of the marine assets. Sales of several other major floating assets are pending.

Recent Sales

McKeil Marine of Ontario sold their 105' twin screw tug "Offshore Supplier" to Thompson Shipping. The 910BHP tug was built by Hike Metal in 1979 and powered with GM16V71's with fixed props in korts. The 75' shrimp trawler "Lucky Thuan" was sold to private parties in Biloxi, Mississippi. The freezer boat was built by Ocean Marine, Bayou LaBatre in 1995 and sold by a bank as part of foreclosure actions. Although Marcon does not specialize in fishing vessels, this is the third shrimper sold on behalf of the bank. T&C Barges of Alaska sold the 160' x 50' inland deck barge "TC-162" to Traylor Bros. of Indiana. The barge, which was heavily built of welded and riveted steel from dismantled Liberty ship sections in '67, was repositioned to So. California to work in the construction market. Keen Waters Navigation fixed the 16,800BHP; 297' ice breaking tug supplier "Kigoria" on a short-term time charter to U.S. interests for cable related operations. The Lloyd's classed vessel was built in 1979 by St. John Shipbuilding & Drydock for Amoco and previously operated by Canmar in Canadian Arctic oilfield operations. Manson Gulf of Louisiana sold its 38' crew boat 'Mr. Ray' to Intertug S.A. of Colombia. C&I Corp. of Alaska sold the 80' passenger / car ferry 'Dick Borch' to Coast Marine Tug & Barge of British Columbia. The vessel was built in 1967 by Blount Marine and powered by a GM12V71 diesel with a fixed pitch prop on either end. Crowley Marine of Seattle sold the 5750BHP twin screw 'Sea Vixen' to Hawaiian Interisland Towing. The 130', ABS +A1 classed, raised foc'stle tug was built in 1976 by Quality Equipment and powered by EMD 16-645E5's. She was damaged by a galley electrical fire off Alaska in January '99. She was delivered to the Buyer 'as is' in July and is being entirely refurbished, re-named 'Nakoa' and placed into domestic and international towing service. A new twin screw 3,300BHP conventional tug from a Chinese shipyard was sold to an U.S. West Coast buyer. The 104' tug is classed BV + I 3/3 E Tug
