Market Update 1st Quarter 2006

The first quarter of 2006 has only increased in momentum, building on a strong end to 2005. All sectors of the market that Marcon covers, including oilfield vessels, offshore towing, and inland towing, are all enjoying record levels of activity. The high levels of activity have pushed day rates up, as well as sale prices. Vessels and barges for sale in all sectors have declined, pushing prices for second-hand equipment to the highest level in recent memory. There are many factors affecting the market, but hurricanes Katrina and Rita seemed to push an already tight market into uncharted territory. The US Gulf has been a vacuum for vessels and barges from the US East and West Coasts, as well as overseas. Overall, Marcon has seen worldwide sales listings drop from over 2,000 vessels and barges to around 1,100. The actual number of vessels or barges for sale that are ready to work is probably at its lowest level in decades. Although Marcon has been through many markets over the last 25 years of brokering, never have all the markets we cover been so tight at the same time. Even back at the last peak of the oilfield market in 1997, when crabbers were being converted back to supply boats, the main action was limited to the oilfield supply and towing sector. With oil and other commodity prices so high and so much repair work following the 2005 hurricane season, we wonder when things will finally cool down.

In the last year, the oilfield market in the US Gulf and around the world has taken off. International flag supply boats have, in many cases, doubled their selling prices, with asking prices sometimes tripled. Vessels built in the 1980s or later are in particularly high demand due to age restrictions in various markets. Slower markets with lower rates are having trouble attracting suitable vessels. Charterers looking to reduce rates with long-term commitments are having trouble finding offers. The majority of operators want to enjoy the rising spot market which they believe will keep outperforming the security of long-term charters. In the last six months, Marcon has sold eleven oilfield vessels, including two dive support vessels, two AHTS vessels, one supply boat, four crewboats, one seismic research vessel, and one utility boat. These sales involved buyers and sellers in the US, Middle-East, and Southeast Asia with most buyers having to travel to areas far outside their markets to find suitable vessels. Many of these vessels had been on the market for a while, but suddenly became attractive. Sellers often had moving price targets that buyers finally hit. As we continue through 2006, Marcon's main concern is finding sellers interested in marketing various types of

R = Rebuilt

Market Update (Continued from page 1)

oilfield vessels. There's a window of opportunity for operators seeking to sell older equipment at good prices as they take delivery of newbuildings. With the tight market, many buyers are also willing to accept some competition limits. History will only tell, but this may turn out to be the best opportunity for sellers for years to come. We currently have buyers interested in all types and sizes of supply boats, tug supply boats, utility boats and crewboats. We also have buyers in hand for large DP vessels built within the last 20 or 25 years.

Offshore towing has been impacted by the growing activity in coastwise liquid and dry cargoes, as well as oilfield activity. Many boats can work in a variety of roles or can be modified fairly quickly. Demand is strong across all markets, so charter rates and prices have been climbing. In the US, twin screw tugs in the 3000 to 7000 BHP range are the most sought after. But lower horsepower boats are also difficult to find. We have recently sold boats on the US West Coast to East and Gulf Coast clients and vice-versa. International flag older twin screw boats have seen resurgence in demand and prices have gone up substantially. In the last six months, Marcon has sold eight tugs, including six US flag and two international. Some of the US flag tugs were sold to international buyers. All tugs sold were twin screw, including one 8000 BHP, one 5750 BHP, two in the 3000 to 4000 BHP range, and the rest between 1700 and 2600 BHP. Many of these boats sold for prices that were higher than expected, but buyers are now satisfied that they made the right decision. Marcon currently has buyers for all horsepower ranges of twin screw tugs. Boats built in the 1980s or later are the most sought after, but older twin screw boats in good operating condition are in high demand regardless of age.

Although ship-docking Z-drive tugs are in high demand, the majority of US vessels were built within the last ten years and rarely come on the market for sale. Over the last few years, we usually had many international flag Z-drives for sale, either from yards or their owners. The demand for 50 to 65 ton BP Z-drive tugs has been so strong lately that deliveries for newbuild orders are now out to mid-2007 or later. There are some international flag Z-drives for sale built in the mid to late 1990s, but generally around 4000 BHP. The market is moving toward higher horsepower ship-docking tugs. We currently have a newbuild 70 ton bollard pull Z-drive escort tug available for long-term bareboat charter, but owners do not wish to sell. We also have a few sellers that may be enticed by unsolicited offers both in the US and international markets. Marcon brokered the long-term charter of an international flag 4000 BHP Z-drive tug in the later half of 2005.

Like their tug counterparts, ocean deck barges are also in high demand. In the US, demand for ocean deck barges has severely impacted the second-hand market. Barges in the 180' to 400' range in any part of the country are hard to find. We still have one US flag loadlined 300' x 90' barge for sale in the US Gulf and a few other US barges as well, but prices have been increasing as supply decreases. On the international front, Southeast Asia used to be the world supermarket of oceangoing barges, but now demand has caught up with supply. Barges with high deck strength are in short supply and prices have moved up considerably. The rise in steel costs in concert

with the rise in demand has placed pricing more in line with other parts of the world. Higher fuel costs have greatly increased the cost to reposition a barge from Asia to other parts of the world, in turn driving up the prices of barges already in Europe, the Middle-East, Caribbean, etc. In the last six months, Marcon has sold six ocean deck barges, including one 300' x 80' from China to US buyers, one 400' x 100' from US to Canada, one 300' x 92' from US to Singapore, one 250' x 72' from US to Mexico, one 150' x 74' (with 200 ton A-frame) within the US and one 150' x 42' between US buyers. This market remains very active with many buyers.

The US inland river market is operating at near full employment of hopper barges and push boats. Increased demand, along with the scrapping of old barges, has finally resolved the overbuilding of the early to mid-1980s. Prices for second-hand inland river barges have substantially increased due in part to the low availability, but also the increase in replacement cost. Barge builders have long backlogs and steel prices are high, so new construction is expensive. Medium to high horsepower pushboats are rarely on the market for sale. Although there are some smaller boats less than 2000 BHP for sale, most are older and need extensive work. The hurricane damage in and around New Orleans has created a new demand, especially for the smaller boats supporting reconstruction jobs. We heard recent stories of boats in the 1500 BHP range in Louisiana earning in the USD 5,000 to 6,000 per day range. With owners earning such high rates, it's hard to find sellers. We have had plenty of buyers for pushboats lately, but few, if any, sellers.

The US ocean tank barge market remains strong with many operators building new double-hull barges, but still seeing good demand for smaller single-hull barges capable of working for several more years under OPA 90. Lately, Marcon's main activity in the tank barge market has been the sale of large US flag ocean tank barges to foreign buyers. Since these barges can no longer trade under US law, they have become an attractive alternative for foreign buyers looking to lighter tankers or transport petroleum coastwise. In the last year, Marcon has sold a total of 10 ocean tank barges ranging in size from 95,000 to 149,000 barrels (about 12,000 to 16,000 DWT). Marcon also sold a 10,000 barrel OPA 90 compliant double-hull barge which stayed within the US. Our buyers remain interested in further acquisitions.

The market for large ocean and Great Lakes hopper barges remains tight. Marcon currently has a few 17,000 DWT units that are probably destined for use as storage, but may be reactivated for ocean service. Marcon recently concluded the sale of a Canadian flag 594' 22,000 DWT self-unloading hopper barge (with 8000 BHP tug) located on the Great Lakes. Barges in this size range

rarely come on the market.

Details of vessels and barges sold by Marcon International, Inc. are available on our website at www.marcon.com (Click on "Sales Reports" in the left margin). Marcon's active listings are also searchable on our website, but please contact a broker to discuss private non-posted listings that may be available.

Marcon has enjoyed a brisk business during the first quarter of 2006. We remain busy with sales pending in various sectors of the industry. Although the market is tight, and sometimes you wonder where your next good listing will come from, we remain persistent and optimistic.

About Marcon International, Inc.

Since 1981, Marcon International, Inc. has provided a wide range of consulting and ship brokerage services to domestic and overseas clients in ocean and inland water-borne transportation, specializing in towing, marine construction, and the offshore petroleum industries. Although our primary focus, as shipbrokers, is in the sale, purchase and charter markets, we have also assisted many companies in evaluating capital acquisitions, market rates and feasibility of trade routes.

Our clients include companies throughout the United States, Pacific Northwest and worldwide. In the interest of our customers, we make constant use of representative and broker contacts throughout the United States and abroad. This extensive and constantly expanding network of contacts regularly supplies Marcon International, Inc. with a wide range of reports, prices and rates which are analyzed and stored for the future benefit of our clients.

In addition to our brokering activities, Marcon regularly performs research and valuation reports on both entire fleets and individual vessels or barges, projects charter rates for new acquisitions and newbuildings, advises on market prospects and conducts physical inspections in certain circumstances.

To-date in 2006, Marcon International, as shipbrokers, has sold twenty-seven vessels and barges. Since January 1990 when we started closely tracking sales, Marcon has sold or chartered 755 vessels & barges (an average of over 46 a year), including over 463,317BHP in tugs, 465,153dwt ocean deck barges, 122,275dwt ocean hopper barges, 2.45 million bbl capacity in ocean tank barges, 60 crew & pilot boats, 79 supply, utility & tug supply and 37 survey, seismic & support vessels in addition to others.

We are interested in receiving information on any vessels or barges – inland or ocean service, surplus to your requirements and available for sale or charter. This can be on a published or private & confidential basis.
